Week 2 – 1 drop 2x per day (Breakfast & Bed)

Week 3 – 1 Drop 1x per day (Breakfast)

Week 4 – 1 Drop 1x per day (Breakfast)

Zymaxid – or – Besivance (Circle Drop Given)

1 drop 4x per day until 1 day after bandage contact lens is removed.

Bromday – or – Ilevro (Circle Drop Given)

1 drop 2x per day for 3 days

Pain Relief

- Take Advil or Motrin: 2 pills every 4 hours as needed for pain
 - If you do not have any relief of pain...
- Vicodin will be prescribed: 1-2 tablet(s) every 4-6 hours as needed for pain up to 3 days.

Following your procedure you can expect:

- Moderate to severe pain, sensitivity to light, burning/stinging, tearing for up to 48 hours.
- Bandage contact lens at days 2-5 will be removed. You will begin to have pain relief after this visit and vision may start to improve. Note: it can take up to a month before you begin noticing an improvement in your vision.
- Do not rub or get surgical eye wet.
- An eye shield will be provided to be worn during sleep.
- If surgical eye becomes unbearably painful, severely red, or if discharge is noticed: Contact the office at 917-460-7065.
- You may return to contact lens use 2 weeks after procedure.
